What is the difference between loyalty statuses?

Loyalty Rewards · https://en.wmmarkets.com/knowledge-base/loyalty-rewards/what-is-the-difference-between-loyalty-statuses/

The primary difference between loyalty statuses is the number of points earned per closed lot and the annual interest rate on your net trading balance. Each status level offers progressively higher rewards, as outlined below:

WM Loyalty Status	Status Requirement	Description & Benefits	Minimum Lots Threshold	Loyalty Points per Lot	Annual Interest Rate Yield	Deposit Bonus Cap
Silver	None	Default Status	0	0.2	0%	$10,000
Gold	Close the minimum lots threshold for Gold Status	Increased point value per lot traded / higher interest rate	20	0.4	0.40%	$20,000
Platinum	Close the minimum lots threshold for Platinum Status	Increased point value per lot traded / higher interest rate	500	0.6	1.20%	$40,000
Diamond	Close the minimum lots threshold for Diamond Status	Increased point value per lot traded / higher interest rate	5,000	1	2.00%	$60,000

For example:

If you are a Gold Status client and close 12 lots in a month, you will earn 4.8 points (12 x 0.4 = 4.8).

If you are a Platinum Status client and close the same 12 lots, you will earn 7.2 points (12 x 0.6 = 7.2).

In addition to earning more points per lot, higher status levels also offer greater interest rates on your net trading balance. This means that as you progress through the tiers, you not only earn more points but also benefit from higher interest yields, enhancing your overall rewards from the Loyalty Program.
