How are Swaps calculated?

Trading · https://en.wmmarkets.com/knowledge-base/trading/how-are-swaps-calculated/

Answer: Calculation of Swap per day for FX, Spot Metals and Spot Indices:

(Swap value) x (pip value in US$) x (no. of lots) = US$

Calculation of Swap per day for CFD Shares:

(Traded Price of CFD SHARE) x (Swap value) x (no. of shares)/360 (days) = US$
